Hydraulic & Pneumatics Assessories

شركة إس إن تي ريد نتوورك
SN Trade Network Company

SN Trade Network Company

industries offer a diversified line of SAE and ISO compliant hose and fittings products.

This covers every aspect of the hose assembly process, so you can count on being comfortable and confident when using any hose assembly that carries testing at maximum test pressure after crimping.

Hose end fittings are to suit hose, standard such as SAE, DIN. Different kind of end fittings such as Fixed male / female, Swivel female, JIC hose – SAE 100, R1, R2, R3, R4, R5, R6, R7, R9, R12, 4SH, 4SN, Spiral, Wire Braided size ; 1/8" ID to 4" ID, Pressure ranging from 100 to 450 bar depending on type and size, with maximum pressure rated up to 1000 bar.

Material : Stainless Steel, Brass (from extruded bar of forging) Surface treatment : Steel – Zinc coated (A3C) or Phosphate, Trivalent Stainless Steel – Electro polished.

Offer High pressure steel fittings as per DIN 2353 and ISO 8434-1 specification, for ease of interchangeability. These fittings are available for pressure rating from 100 to 630 bar type. Flare less Bite type (Single Ferrule) Weld Nipple type, Standard DIN 2353 / ISO 8434 -1 series; LL (light), L (Medium), S (Heavy) , size 4 to 42 mm; 1/8" OD to 2" OD; 1/8" NB to 2" NB Pressure rating from 100 to 630 bar depending on the type and size of material.: Steel, Stainless Steel, Brass (from extruded bar or forging) surfaces treatment : Steel – Zinc coated (A3C) of Phosphate coated, Trivalent stainless steel – Electro polished, silver plated.

Socket weld fitting as per ANSI B16.11 standard. It is available in different class i.e. 3000 & 6000 PSI type; Forged fittings – Socket weld or Flange. Material – ASTM A105 / ASTM A182. Dimension – ANSI B16.11 size 1/8" OD to 2" OD, 1/8" NB to 2" NB class: 3000 to 6000.

Hydraulic Cylinders, Rotary Activators Manifold Blocks & Prefill Valves

شركة إس إن تي ريد نتورك
SN Trade Network Company

We have the Expertise and Capacity to manufacture Hydraulic Cylinders range from 40 to 320 Bore as per ISO standards in Double acting version. Special Cylinders in Single acting, Double acting can be manufactured as per clients requirements, Pressure rating 160 to 700 Bars and Maximum Bore of 1000 mm. with Stroke up to 6000mm.

SN Trade Network Company

also undertake reconditioning repair and modification of all types of Hydraulic Cylinders Single and Double acting with Pressure testing.

Rotary Activators Torque range from 40 to 30,000 Kg/meter with the working maximum Pressure of 210 Bars, this Rotary Activators can be used for the rotation of 90, 180, 270 and 360 degree.

Manifold Blocks are made as per client's requirement with the flow of 30 to 1000 LPM and 350 Bar Pressure. High Pressure Manifold Block with logic control screw in cartridge Valves, rated Pressure of 500 Bars can be made as per requirements. For higher flow rate above 700 LPM and maximum 3500 LPM, we can offer logic control block with slip in cartridge valve with maximum size of NG 63 as per DIN 24342 (ISO 7368).

Prefill Valves These Valves are used in huge cylinders mainly in Hydraulic Press application for high speed approach, requiring large volume of Oil flow. Prefill valves can be supplied in the range maximum flow rate of 5700 LPM with Flow velocity of 3mt/sec with or without decompression features.

Please contact us for your requirements and detailed information.

Hydraulic & Pumps & Motors

شركة إس إن تي ريد نيتوورك
SN Trade Network Company

Hydraulic Pump:

Gear Pump (External Type) Flow rate 1 cc/rev to 200cc/rev Pressure rating maximum 250 Bar, RPM 3000;

Vane Pump: Flow rate 8cc/rev to 350 cc/rev; Pressure rating maximum 280 Bar, RPM 3000;

Axial Piston: Flow rate 20cc/rev to 500cc Pressure rating maximum 350 Bar, RPM 3000 with Fix and Variable Displacement, Open Loop or Close Loop,

Radial Piston Pump: Flow rate 5 cc/rev to 90cc/rev; Pressure rating maximum 700 Bar, RPM 3000.

Hydraulic Motor

Gear; Vane; Axial Piston (in line & Bent Axis Type); Radial Piston Motors, Orbit Motors (LSHT) Gerotor; Gerolar Type, Speed Min 20 RPM and maximum 8000 RPM with Torque 1 Nm/mt bar to 100 Nm/mt bar, Flow rate 10 CC/rev to 1000CC/rev; for Industrial and Mobile application.

Pumps and Motors are available with SAE (AA) to SAE (F) & ISO- 80 to ISO- 200 Flange, 2 & 4 bolt mounting, with straight key shaft, 30 Degree involutes Spline shaft and Taper shaft; Suction and discharge port with BSP, NPT Fitting or Flange Type, SAE and ISO to Suit the requirement.

Please contact us for your requirements and detailed information.

Hydraulic Valves

شركة إس إن تي ريد نتورك
SN Trade Network Company

Fluid Mech can offer complete range of Hydraulic Control Valves for Industrial and Mobile applications:

Directional Control Valves (Industries) size CETOP 3; 5; 7 & 8 with Flow rate of 650 LPM; Mobile Valves Section and Monoblock type with or without Load Sensing and flow rate up to 1200 LPM, maximum 2 inch Fitting, these valves can be operated with maximum Pressure of 350 Bar.

Control Valves offered are: Pressure Relief Valves Direct operated and Pilot operated with Maximum Flow of 600 LPM and Pressure rate 350 Bar. Flow control valve ; Check Valve ; Load control Valve ; Counter balance Valve ; Over centering Valve; Cross Port Relief Valve ; Pressure reducing Valve; Sequence Valves; Shuttle Valves and Flow Divider/Combiner, are offered with Flow Rate of 600 LPM and Pressure of 350 Bar.

Circuit saver (Hydraulic integrated Control Block) for Specific application can be offered are: Pressure Intensifier; Hydro Static Transmission; Regenerative Circuit blocks ; Load Lowering valve blocks; Winch Brake Release Unit; Decompression Blocks ; High Flow Unloading; Pressure Intensification Safety System in Larger Cylinder etc.

Slip in Cartridge Valve logic Blocks are offer for large flow rate up to 5700 LPM, with max size of NG 63 as per DIN 24342 (ISO 7368). This systems are Special Design as per application requirement. (Please Contact us for your Requirement and details information.)
